2015-07-01 Icons are one of
the most important features
in an interface. They are
more than that, they also

visually enliven your desktop environment and provide a subtle hint of what your computer does. Interior

Design is a set of 11 different high resolution icons covering almost all popular applications found on Windows. This set of icons is free for personal use. All you have to do is just click on the provided link and download the set of icons. There are 2 versions of the icon set: classic and big version. The big version set are bigger and use a

more professional look. The only difference with the classic set is that you can see a tiny box on the left side of the icon representing the original size of the icon used to make the whole icon. Just click on the icon you would like to download and wait for a few seconds. The large icons will appear in a folder on your desktop as soon as they are ready. The downloads are simple, just check the download size to see the available formats and download the icon set.

Clock is a realistic, world-
wide weather clock for
display in the lower right
corner of your screen. It can

be viewed from any location on your computer or on the internet. It displays the temperature, time, location, elevation, and forecast at a location in the world closest to your location. Worldwide Weather Clock Description: Worldwide Weather Clock is a realistic, world-wide weather clock for display in the lower right corner of your screen. It can be viewed from any location on your computer or on the internet. It displays the temperature, time, location,

elevation, and forecast at a location in the world closest to your location. It is a small, unobtrusive and useful widget which displays the date and current weather conditions. You can use the widget as a contextual weather clock, weather forecast, screen calendar, alarm clock, and more. Some information about the widget may be stored in your computer, in order to store some data in the item history. Today Weather Clock Description: Today

Weather Clock is a small, unobtrusive and useful widget which displays the date and current weather conditions. 09e8f5149f

The HUD Time is a widget designed to display the current date and time on your desktop in a heads up display style. You can place the gadget anywhere on your desktop and dock it to the top panel for always showing. Its transparency can be controlled from the widget context menu as well as from the Options menu. More... Stylish Date Widgets for Vista/XP/Windows 7 Have

you looked at the stylish widgets of Vista/XP/Windows 7? We have a collection of widgets made specifically to make you look sharper when you use your computer. All the widgets are very small in size, and can be placed on any screen of your PC. If you feel there is not enough room on your desktop, the widgets can be docked to the taskbar. The widgets are small, so you can easily place them anywhere you want. But of course, they are

configurable to have more room for the widgets if needed. If you already have a PC, you can grab these widgets from our Zip file to get started instantly. Now you have more space to look sharper with the Vista/XP/Windows 7 style widgets. The following desktop widgets are in this zip file: Vista Calendar Gadget: This gadget shows you the month in an overall calendar view. You can also open up the calendar to see more detailed views. You

can resize the calendar widget and it will adjust the dates accordingly. The calendar colors and background color are customizable. Vista Clock Gadget: This clock shows you the date and time in a nice professional and versatile style. It can also synchronize your mobile with the time. Vista TimeZone Gadget: This gadget shows the timezone in the selected area on your desktop. Vista Weather Gadget: This gadget shows

the current weather in a nice format. You can also change the font and background color. Vista Schedule

Gadget: This gadget displays a general calendar view in a taskbar when the desktop is minimized and gets larger when you un-minimize the PC. Vista Wallpaper

Gadget: This gadget allows you to set the wallpaper in your PC. It can be saved as a JPEG picture to give your desktop a nice change of look. Vista OS X Gadget: This gadget changes the

Windows Vista desktop theme to a Mac OS X look.
Vista Day Clock Gadget:
This gadget shows you the date and time in a general format. It can also synchronize the mobile phone with the time. Vista World Clock Gadget
