

classic LMC SSL compression + new creative tools.
The LMC+ plug-in is a new and greatly improved version of the classic SSL Listen Mic Compressor. It combines two independent compression modules, two independent recorders, and two independent data streams on a single chip. Using a unique technology developed by JWT, LMC Producer manages the compression and cutting of audio data, providing high-quality compression compared to competitors. In addition to this standard functionality, updated LMC Matte FM codecs, improved open source software that completely converts the audio channel, improved data stream and more accessible software from JW Toolbox - these and some other innovations allow the user to significantly improve the sound of the transmission. For these purposes, users can choose from a variety of options in the following versions: LMC Matten - an LMC package that automatically converts a multi-channel audio signal to a single mono-channel; LMR Audio Converter - a package that allows you to convert any audio server into a mono format by delay time and into sound by contrast; SLC AudioMatte - has the same features as the LMC and is also suitable for use with any audiophile audio and video projector Mathematic Matte is an MMAT package that supports multi-channel and stereo audio cutting for use with any audio projector; MM-Audio - makes it easy for those users who want to apply LME Matte modules to audio-video media converters without having to use additional programs or experiment with switches; Meteor Converters is a software package that provides all major audio amplifiers to work as bridges or only with CAT IV sources and switchers, which can be used as digital and analog audio and video blocks. LMC Module Specifications: Number of Channels: 3D, 2D Number of Streams: 1/2 Compatibility: SSL or Link Audio 2.0 LMC Listen ME Linear Producers audi
