- Listen to your music with headphones - convert your own MP3 files - record audio from a microphone - decomposed sinus waves as an image - wave output to a file - wave decomposed to a microphone - waves decomposer, wave decomposed, wave output to a file, wave decomposed to a microphone If you like waves decomposer, feel free to give it a 5 star review ( comments ) and take a look at its feature in detail: Visit Its a really easy to use application that allows you to track audio input from a microphone into a wave file. If you take a look at the detailed specifications, you will see the features available in our application. Same as the above application for android, this application also does this same thing. 2. wave-filter The wave-filter is a small application that can filter and cut audio input from a microphone to get a specific range of frequencies. This application can be used to change the pitch of the input audio from a microphone. Here's the link to the description of the application: Wave-filter Features: \* cut the audio input by using the lowpass, highpass and bandpass filters. \* capture audio input from a microphone. \* the frequency range to pass through can be modified through the buttons. \* change the sample rate or the sample rate to output for the microphone can be modified through the buttons. \* change the frequency range to output for the microphone can be modified through the buttons. The following application is a Gimp plugin for converting 1 to 1 between the PNG and the WAV format. Gimp for Windows can automatically display the image when the WAV file is opened in the image editor. If you want to give it a try, download and install Gimp. It is available in Hey, There is also a web version of this Gimp plugin. Check out this link: Here's a similar application to the above Gimp plugin but this one has more features than this one. Instead of doing a 1-to-1 conversion, this application combines both
