Photoshop opens to a `_new_` document, which is quite different from most other graphics programs that open to an existing document. You create a new document from the New menu, as shown in Figure 2-4. Click the Create a new document radio button.

**FIGURE 2-4:** Choose a new document from the New menu. The New Document window opens with a blank canvas ready for you to create your masterpiece. In fact, you can type or even draw directly onto the document. You can select portions of an existing image. To select a part of your image, press `Ctrl+A` (Windows) or `+A` (Mac) to select the whole image and then press the left or right arrow keys to select a small portion of the image. To select a large area, press `Ctrl+A`, but first hold down `Alt` (Windows) or `Option` (Mac) and use

[Cardiac MRI in ischemic heart disease. Methodology, clinical application and future prospects]. In recent years, increasing awareness of the high incidence of cardiovascular disease has stimulated interest in the possibilities provided by magnetic resonance (MR) imaging to explore structural and functional aspects of the heart. Ultrasound is a widely used method which enables accurate assessment of cardiac anatomy, wall thickness and volume. However, ultrasound measurements are hampered by operator dependency, by acoustic windows in obese patients, and by cardiac cycle variations. Cardiac imaging by MR is being applied in a steadily increasing number of patients and institutions. MR investigation can now be performed in the majority of patients undergoing coronary angiography. Coronary anatomy is evaluated using three-dimensional techniques to visualize coronary arterial lumen, wall thickness and plaque. Evaluation of wall motion and ventricular function is assessed by cine-MR and phase-contrast techniques. Late gadolinium enhancement by MR can detect myocardial scarring secondary to myocardial infarction. In addition to morphology and function, metabolism and blood flow can be monitored. Q: jQuery UI Autocomplete on change event I have the following code. I'm trying to use the jQuery UI Autocomplete control, however only want it to appear if the user enters 2 characters or less into the input box. `$( "#search" ).autocomplete({ minLength: 2, source: function( request, response ) { $.ajax({ url:'scripts/search.php', dataType: 'json', data: { term: request.term }, success: function( data ) { response( $.map( data, function( item ) { return { value: item.content, data:`

Inhibition of delta-Aminolevulinic acid dehydratase activity increases L-6-lysine and L-leucine pools in *Saccharomyces cerevisiae*. In this work, the effect of short-term inhibition of plasmatic (ALADP) and mitochondrial (ALADM) delta-aminolevulinic acid dehydratases in *Saccharomyces cerevisiae* on the cellular levels of L-lysine and L-leucine and the synthesis and degradation of the amino acids (AA) for growing cells were studied. For that purpose, the plasmatic and mitochondrial ALADP activity and the ALADM activity of the mitochondrial enriched fraction were inhibited using SHU-101 and L-683026, respectively. The AA levels and the synthesis and degradation of the AA (lysine, leucine, threonine, valine, glutamine, serine, glycine, histidine and alanine) were analyzed after 30 min-treatment of the cells with the inhibitors. L-lysine and L-leucine concentrations increased after treatment, while the other AA were not affected. These results indicate a modification of the ALADP activity as a consequence of the inhibition of the mitochondrial ALADM activity or a reversible modification of the cellular membrane and its permeability, allowing the entrance and retention of the L-lysine and L-leucine. In a nationwide opinion poll published by The Washington Post on Wednesday, a solid majority of Americans support President Trump's decision to rescind Obama-era rules governing transgender bathrooms. The poll found that 69 percent of registered voters support the president's decision, with only 27 percent of those surveyed voicing opposition to the rollback. "Those Americans who are opposed to transgender bathrooms have been in the minority for years," said The Washington Post's editorial board, which had previously suggested that the federal government "should defer to states and localities in regulating bathroom access." In 2015, the Obama administration released an extensive set of guidelines on gender identity under the guise of a much-ballyhooed "Dear Colleague" letter. The letter was introduced as a non-binding, executive branch document that would simply give guidance on how federal agencies should respond to questions about discrimination against transgender people. But the letter had the unintended consequence of legitimizing the concept of sex-based discriminatory protections at the federal level.
