* Photoshop does have some limitations that are a result of using a 32-bit system. Most people have a monitor or web browser that only displays images at a maximum of 8-bit color depth. And many graphics files that professionals will manipulate contain less than 8-bit color depth. * Photoshop is not free software, like a lot of other advanced graphics editing packages, which would make it a better choice for photographers and graphic artists rather than graphic design students or web page designers. ## Adobe Illustrator Everyone knows the name Illustrator. Many people don't realize, however, that it's a program that runs only on Macs and that was originally designed for digital artists and graphic designers to create vector-based images, such as architectural diagrams, logos, and cartoons. Illustrator is a great choice for people who prefer the drawing aspect of creating images to Photoshop's layered editing system.
