Schnabel: "Not for the faint hearted, Elden Ring is without doubt one of the most spectacular games I've played for a long time. The complexity of it is astounding, as is the astonishing performance of the game that comes out of nowhere. It's difficult to describe, but in the words of an ancient sage, 'The price of admission is the price of admission itself' - well, I say that as someone who enjoyed the freedom of checking out solo games and the freedom of playing on my own. At times the game kind of feels like that for me, and yet at other times I felt compelled to invite other friends over to play - or to just go on with the experience alone. No other game, real or virtual, has ever made me so insanely happy in a game. It's pretty much what all that talk about 'experience' was all about: the vast fields dotted with huge creatures, the stark journeys with no real landmarks (the roads have a disorientating effect), the task of choosing your own path, avoiding enemies, and saving the world. Of course, not everything's perfect: the tutorial is kind of limited and doesn't really go into much detail, the character creation process is a little messy and not all that intuitive, and a few minor problems can make a bad game quite unpleasant to experience." DoomKrapus: "The game's fascinating plot is a mixture of diverse ideas and characters, ranging from the classical to the grotesque. The characters and the story are intricate, convincing, and full of emotion and development. The game's artificial world breathes life and the emotion is effective, as well as the game's various interaction and soundtrack. I have to mention that the characters' emotions don't only improve upon NPC characteristics (their responses, actions, and personalities), but also their appearance, which makes it easier to sense their emotions. The game's main character is quite bland, but the game fully supports the interactions between him and each of the characters. I really enjoyed the game's NPCs and the interactions I had with them, especially with the various returning characters. Many emotions came to the surface and I was able to feel how deeply the game has been developed." The best RPG for 2017 so far! Tom's Take: "The line between art and life blurs here. The art design on Elden Ring is phenomenal, and it's enhanced by the stunning color palette of the world. The music blends well with bff6bb2d33

What's new:

Battle against formidable monsters and impregnate time to gain rewards. Join the journey and rise as a Tarnished, one step closer to becoming a full-fledged Elden Lord! *This content is exclusive to PlayStation Vita users and compatible with* Full Review >< >>

The world of Orience is written in the garbled look of the Elden Codex. One day a disturbingly nasty goddess and several ugly overlords appeared in an outer plane. This very spot caught the attention of the Gods and monsters of the world, and soon the last of Orience was turned into a war-torn land. War is slowly taking Orience away from us from near and far as horrible circumstances slowly wrap themselves around our hearts, but only the Tarnished remain who are in search of redemption. Trial and error will always be the keys to our developments with Orience has a dark story that it doesn't know how to resolve, and it has been told in fragments. As you journey with Tarnished seeking different kinds of dungeons and monsters, Orience will slowly grow on your heart. When you enter a new dungeon and find some nearby Tarnished, they will exchange words and feelings as they journey

together, and sometimes if you succeed in upgrading their attributes, they will blow you a great atmosphere and create an epic story. With this game, the reality of the dungeon-crawling RPG that was lacking in the previous RPGs is brought back to the player. "How can I distinguish myself from other Tarnished outside of the game's very small plot?" This question will inevitably pop into the mind when starting to play as a character, but actually there is a place where the Tarnished can fit in while being unique. To be Tarnished means to carve your own path to the light, so here is where the story and other Tarnished begin to arise. "Don't be a follower, don't be a pawn, and don't be a puppet" is what the Tarnished of Orience say to themselves. They create their own story, wander around, and meet people to exchange conversation and story. The cause of a new Tarnished to arise? To answer this question is to analyze the reason behind a Tarnished's adventures, and to discover the reasons are engraved in the five items called the Origin Stones.

We can smell the #WomenAtGames initiatives coming a mile away. Microsoft Research Labs announced a #WomenAtGames initiative, and the company also ran a #WAGs campaign this past week, highlighting some brave real-life women who just aren't afraid to compete. The goal of this new initiative is two-fold. First, it puts a spotlight on women and diversity in gaming. Microsoft recognizes that gaming is a growing industry that employs more than 1.5 million people, and with a workforce that's almost 90 percent male, it's clear that diversity is key to the health and sustainability of this industry. According to one senior executive, Microsoft needs to attract, hire, and retain the right talent to expand its business and create next generation of gaming experiences. The other goal of the #WomenAtGames campaign is to highlight the talent of amazing women who are already making a big impact on the gaming industry. Microsoft Research Senior Researcher Anna McGregor, for example, has been working on creating a new form of computer programming language called MindTerm. McGregor will discuss how she envisions MindTerm as a science-focused alternative to current technology at the upcoming conference GDC. You can find more information on her achievements here. There are so many more women who are making a big impact in all areas of video games that we can't list them all

How to use single function for Output of Two functions I have two functions that using for calculating Share of Income/Expense of User and Users who are present in two lists. One is User Accounts Indexing Function. The other is Income Expense Function. While returning the Share of Income/Expense of a particular user it is showing NaN. userIndexing() and seeIncomeExpense() returns NaN for share of Income/Expense. I tried showing this share: ng-click="calculateShares()" In the same way calculated this, but it is returning NaN for Income/Expense share Value. calculateShares() is called by ng-click. Both these methods are in income.profitTable component.
