we've talked about the grass being cut every two years and some of our councils are doing this as part of their meadow grass maintenance programme. i don't know how long they have been doing it, but i guess if you see a meadow left uncut for a long time you'll have to assume that it's being maintained by the council. the council are responsible for mowing the grass and we have to point out though that the grass is predominantly devon county council (dcc) owned and the highways meadow grass maintenance programme is a joint initiative with exeter city council, as we carry out the cutting on their behalf. you could opt to leave meadow grass uncut until the next spring which is a very valuable wildlife habitat and provides much needed shelter over winter. leaving grass uncut though does tend to make it courser and tussocky. good for insects but not so good for wildflowers that have to contend with thick grass and generally get outcompeted by it. i have now perfected the process and have the table set up. i am now able to order a single uncut panel at a time. these are usually cut off pallets of panels, which are generally 2ft wide by 8ft long. the pallets are unpacked and placed on the equipment and the panels are cut off. the panels are then loaded into boxes and taken to the glaziers. the panels are put into a specially designed box made of wood with glazing side and back panels. the last time i was uncut i was nearly 18 and i have spent most of my adult life now uncut. i have been uncut for well over 15 years now, since i was 15. i was out of the house for a couple of years, travelling. my parents were not happy. however, after they got over their concerns, they did not seem to care anymore. i am now 16 and have been uncut for about 10 months now. i recently got my first cock, from a friend of mine. it was very nice and very big. it was a great experience and one that i will never forget. i will be getting bigger and bigger in the coming months. i can't wait to get my first real hard and real big cock. 5ec8ef588b
